

*What you always wanted to know, but were hesitant to ask*

In the era of ongoing advancement in medical technology,  
Ethics has been pushed to the backseat,  
in health care, research and academics!

There is a word of caution from 'Ethics' to all...  
...since technology is giving rise to several ethical issues  
in the field of medicine.

Remember the story of the hare and tortoise?

There is a need to align them 'together' at the same level

How? ..... Join us to know more!
