YENEPOYA DEEMED TO BE UNIVERSITY POSTGRADUATE DIPLOMA IN CLINICAL ETHICS (PGDCE)

Ethics, originally a branch of philosophy, but now a discipline in itself, addresses questions about the rightness versus wrongness of an action. In its new avatar – bioethics – it has broadened its scope and is not necessarily restricted to the medical sciences. Modern healthcare involves increasingly complex situations, never encountered by healthcare providers in the past. Genetic engineering, stem cell therapy, life-sustaining technologies give doctors the power over the lives of their patients.

Clinical ethics is a specialized application branch of bioethics that enhances the quality of health care, by resolving dilemmas and conflicts between the various stakeholders, and thereby restoring the trust of society in the healthcare system. A clinical ethics consultant is an expert trained in clinical ethics who can provide unbiased solutions to ethical conflicts in the healthcare setting.

The Centre for Ethics, YenePOYA deemed to be University, Mangalore, India was established in February 2011, with the objective of fostering a renaissance in bioethics in health professions education in India. Since 2014 the Centre has been successfully conducting Postgraduate Diploma in Clinical Ethics, in collaboration with the Institute of History, Philosophy & Ethics of Medicine, Johannes Gutenberg University, Mainz, Germany. Admissions are now open for the seventh batch (2020). This one-year program commences in March 2020 (three contact programs of 5 days duration in March, July and October - tentative dates, liable to change).

The course is especially designed keeping busy healthcare professionals, academicians and clinicians in mind. The unique curriculum is tailored to suit the contemporary needs of our country.
